

ESITO Final Report on STEO

2007/2008 Research Reports

The e-learning research undertaken by the Waikato Institute of Technology (Wintec) in collaboration with the Industry Training Federation (ITF) and supported by the AgBiotech Innovators Academy referred to above has now been completed and is available through the link below.

Project

Using e-learning to build workforce capability: A review of activities

Project Manager/Lead Organisation(s)

Wintec and ITF

John Clayton

Email: john.clayton@wintec.ac.nz

Project Summary

The project aims to:

- Identify and report on the ways in which ICT and e-learning is employed in work-based and work-placed learning both internationally and nationally.
- Describe the known impact of ICT and e-learning on building workforce capability globally and nationally.
- Assess the demand from employers, providers and learners for ICT and e-learning in improving individual and organisational capability.
- Demonstrate how, and in what ways, ICT and e-learning can aid particular industry sectors in building workforce capability.
- Examine and explore reasons why ICT and e-learning is not being used in particular industry sectors to support work-based and work-placed learning.
- Recommend further activities that could be taken to promote and embed the effective use of ICT and e-learning in work-based and work-placed e-learning.
